

High Capacity and Large Volume Production Capabilities

These machines provide the highest efficiency. Each machine is custom built to our specifications by the finest manufacturers in Europe. We are able to produce significantly more finished goods per hour for competitive unit pricing.

Our machine operators have years of experience and are specifically trained in procedures with mentor partnerships. This training provides critical knowledge of safety, cleaning, ingredient blending, flow, consistency, and set up of substrate materials.

Production Capacity

The high-volume equipment has capacity for increased production.
